

CeLAN Touch Screen

DS-Ce-TS Rev A

The CeLAN Touch Screen provides a 5.7" Color LCD (liquid-crystal display) to provide the user with complete on-site system programming and operation control of the Protector System. The 5.7" Color LCD provides a graphical user interface to display visual status messages for the entire system. The display identifies any programmed location so the user can determine where an alarm, trouble, or open-sensor condition exists. Location names or zone/sensor text are displayed allowing for easy identification.
